

Trails

(technical specification)

J12

1- **The lacquered panels** are made from very high quality plywood 22mm thick, made of alternate layers of thin birch, which offers longevity and an exceptional mechanical strength. The colours are applied by electrostatic spraying of two-component polyurethane lacquer that is free of heavy metals, to ensure high levels of resistance to potentially aggressive chemicals such as anti-graffiti cleaning products.

2- **The platforms** are 21mm plywood panels made up of layers of birch. The surface is coated with a film of non-slip phenolic resin.

4- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

5- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
