

Climbing equipment

(technical specification)

1- The vertical 95mm square post are made of laminated timber, which have not been treated with chrome or arsenic. Splinter-free, the laminate provides great strength and dimensional stability. The posts are protected from wear and tear caused by fungi and insects.

The posts are protected by injected polyamide caps.

2- The climbing wall is 21mm thick panels made up of alternating layers of birch. The surface is coated with a film of anti-slip phenolic resin.

3- The tubes are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

4- The 16mm diameter ropes are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

5- The climbing holds are made of polyamide for its strength and rigidity.

6- The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
