

Rotating equipment (technical specification)

J2594-M

1- **The 125mm diameter post** is made of painted galvanised steel. The two-tone grey grained finish has a slightly undulating surface for increased scratch resistance. The cap is made of injection moulded polyamide.

2- **The tubes** are made of stainless steel, guaranteeing lasting durability and reliability of the equipment.

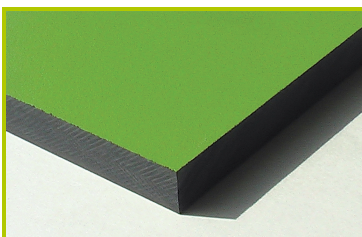

3- **Injection moulded polyamide fixings** connect the posts with the platforms and the various play features.

4- **Injection moulded polyamide fixings** connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

5- **The seat** is made of shock absorbing moulded honeycomb rubber.

6- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

7- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
