

City (technical specification)

J2603

1- **The lacquered panels** are made from very high quality plywood 22mm thick, made of alternate layers of thin birch, which offers longevity and an exceptional mechanical strength. The colours are applied by electrostatic spraying of two-component polyurethane lacquer that is free of heavy metals, to ensure high levels of resistance to potentially aggressive chemicals such as anti-graffiti cleaning products.

2- **The platform and the seats** are made from a 12.5mm thick textured and non-slip compact material (HPL).

3- **The 68mm square posts** are made of laminated timber, which have not been treated with chrome or arsenic. Splinter-free, the laminate provides great strength and dimensional stability. The posts are protected from wear and tear caused by fungi and insects.

4- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
