

Aquatica (technical specification)

1- The shaped beam (95mm thick, 200mm wide and 3.2m high) is made of oven-cured laminated wood with a surface coating; It gives the structure considerable strength.

2- The platforms are made from a 12.5mm thick textured and non-slip compact material (HPL).

3- The tubes are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

4- The 16mm diameter ropes are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

5- The balcony is made of 3mm perforated aluminium sheet, coated with polyester epoxy lacquer.

6- The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
