

## Rotating equipment (technical specification)

J3501

1- **The rotating platform** is made up of 2 HPL discs that give the equipment an extremely solid base. A non-slip channelled aluminium surface provides a good hold during rotation.

2- **The oscillation system** is based on the interaction of three highly resistant steel springs (35SCD6 grade steel) fitted with anti-trap retention components.

3- **The grip section** of the stainless steel handle is overmoulded with rubber to give a good grip.

4- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
