

# Cableways

(technical specification)

**J2581-M**

1- **The 125mm diameter posts** are made of painted galvanised steel. The two-tone grey grained finish has a slightly undulating surface for increased scratch resistance. The caps are made of injection moulded polyamide.

2- **The fixing elements** are made of injection moulded polyamide.

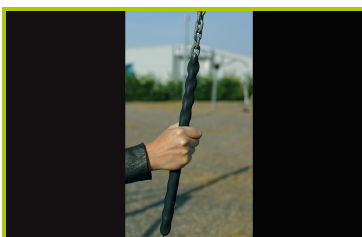

3- **The tubes** are made of stainless steel, guaranteeing lasting durability and reliability of the equipment.

4- **The one-piece rail** is made of stainless steel. The limit stops located at the ends of the rail set the maximum range of the movement.

5- **The skateboard** is made with a non-slip rubber overmould. The stainless steel trolley is fitted with a sealed ball bearing system that ensures fluid, regular movement.

6- **The chains** are made of stainless steel covered with rubber.

7- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
