

## Climbing equipment

(technical specification)

J3800-M

**1- The 95 x 95mm posts** are made of painted galvanised steel, ensuring robustness and durability. The caps are made of injection moulded polyamide.

**2- The platform and the climbing wall** are made from a 12.5mm thick textured and non-slip compact material (HPL).

**3-** The climbing holds are made of polypropylene. They are non-toxic, inflammable and shock and UV resistant.

**4- The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

5- Injection moulded polyamide fixings connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

**6- The 16mm diameter ropes** are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

**7- The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
