

## City (technical specification)

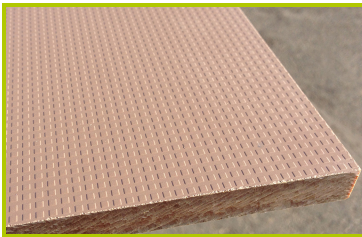

J4070

1- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

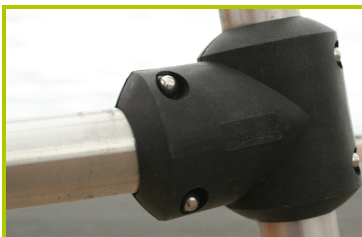

2- **The platforms** are made from a 12.5mm thick, textured, non-slip compact material (HPL). Further reinforcement is provided by galvanised steel supports, located on the underside of the platforms.

4- **The steps, the climbing wall and the inclined element** are made from a 12.5mm thick, textured, non-slip compact material (HPL).

5- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

6- **Injection moulded polyamide fixings** connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

8- **The Kayak slide** is made of rotomoulded polyethylene.

**9- Plastic parts** are made of injected polyamide.

**10-The climbing holds** are made of polypropylene. They are non-toxic, inflammable and shock and UV resistant.

**11-The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
