

# Furniture (bench, waste bin, shelter...)

(technical specification)

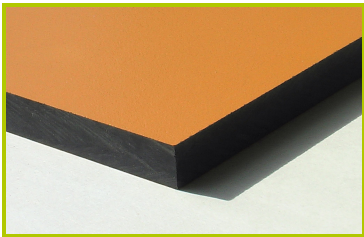

J2840

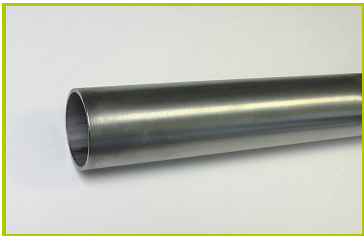

1- **The wall panel** is made of aluminium sheet 3mm thick. The surface is covered with two layers of polyester epoxy coating.

2- **The 125mm diameter posts** are made of painted galvanised steel. The grained finish has a slightly undulating surface for increased scratch resistance.

3- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

4- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

5- **Injection moulded polyamide fixings** connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

6- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
