

Traditional equipment (technical specification)

J4920

- 1- **The posts and the horizontal beam** (diameter 120 to 140mm), are made from sap free robinia.
The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

- 2- **The handles** are made of galvanised, painted steel.

- 3- **The dampener** is made from rubber.

- 4- **The rocking mechanism** is made of stainless steel.

- 5- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
