

Multi play structures (technical specification)

J4934

1- **The different posts** (average diameter: 60 to 80mm / 100 to 120mm / 120 to 140mm) are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- **The climbing wall and the inclined element** are made from larch (plank sizes 140 x 27mm / 45 x 68mm). Larch is naturally resistant and long lasting.

3- **The roof** is made from larch logs (80 x 40 mm).

4- **The platforms** are made from a 12.5mm thick, textured, non-slip compact material (HPL). Further reinforcement is provided by galvanised steel supports, located on the underside of the platforms.

5- **The slide** is made of stainless steel.

6- **The chains** are made of stainless steel.

7- **The climbing holds** are made of polypropylene. They are non-toxic, inflammable and shock and UV resistant.

8- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
