

sliding

■ **Fireman's pole H: 1.37m**

The pole enables children to take on the role of a fireman and slide down with their legs wrapped around the pole, whilst gripping with their hands. The height of the pole (3.4m) means that it provides a challenge at a testing height for the junior age group. The curved shape of the stainless steel pole adds to the design appeal and play experience.

■ **4 a la ligne**

climbing

■ **Curved ladder**

The curved shape ergonomic of the stainless steel ladder adds an extra design and play dimension to this platform access. It requires children to use strength and balance to climb the rungs of the ladder, before using their spatial awareness to negotiate the gap between the ladder and the platform.

## climbing

### ■ Incline net H: 1.37m

The net is accessed from ground level and provides an access to a platform (1.37m or 1.77m) on the multi-play unit. Balance and coordination is tested by the moving ropes and the curved shape of the element. An additional challenge comes in the form of being able to constantly see the distance to the ground below.

## meeting / role play

### ■ Square platform

The size of the square platform (1.2m x 1.2m) means that it can cater for a large number of users at any one time. Up to 4 separate play elements can be connected to the square tower. The platform is manufactured from non-slip HPL, providing users with additional grip under foot.

1.37m: height for younger users looking to learn and develop climbing and balancing techniques.

1.77m: height for users in search of intermediate to advanced play challenges.
