

Diabolo

(technical specification)

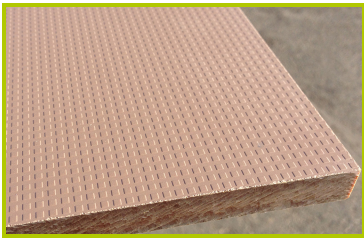

J38122

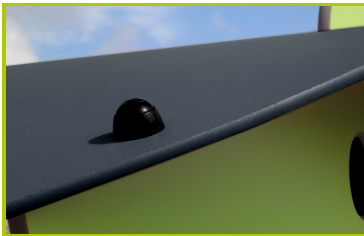

1- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

2- **The 95 x 95mm posts** are made of painted galvanised steel, ensuring robustness and durability. The caps are made of injection moulded polyamide.

3- **The platforms** are made from a 12.5mm thick textured and non-slip compact material (HPL).

4- **The roof** is made of 10mm thick polyethylene plates.

5- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

6- **Injection moulded polyamide fixings** connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

7- **The sliding surfaces** are made of 2mm thick stainless steel, which is shaped, bent and rolled from one piece.

8- **The Kayak slide** is made of rotomoulded polyethylene.

9- **The steps of the catwalk** are made with a non-slip rubber overmould.

10-**The 16mm diameter ropes** are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

11-**The abacus spheres** are made of polycarbonate sheets.

12-**Plastic parts** are made of injected polyamide.

13-**The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
