

# Diabolo

(technical specification)

J3873

1- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

2- **The 125mm diameter posts** are made of painted galvanised steel, ensuring robustness and durability. The caps are made of injection moulded polyamide.

3- **The platform and the climbing wall** are made from a 12.5mm thick textured and non-slip compact material (HPL).

4- **The climbing holds** are made of polypropylene. They are non-toxic, inflammable and shock and UV resistant.

5- **The anti-slip steps** are made of corrugated aluminium sheets ensuring durability and lasting good looks.

6- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

**7- Injection moulded polyamide fixings** connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

**8- The sliding surfaces** are made of 2mm thick stainless steel, which is shaped, bent and rolled from one piece.

**9- The 16mm diameter ropes** are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

**10-The roof** is made of 10mm thick polyethylene plates.

**11-The abacus spheres** are made of polycarbonate sheets.

**12-The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
