

Traditional equipment (technical specification)

J4914

1- **The posts with average diameter 120 to 140mm** are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- **The seat** is made from rubber, 13mm thick.

3- **The 16mm diameter rope** is made of galvanised steel cable covered with polyester.

4- **The fixings for the nets and chains** are made from aluminium.

5- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
