

Climbing equipment

(technical specification)

J49104

1- The posts with average diameter 120 to 140mm are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- The boards are made from sap free robinia (plank sizes: 22 / 27mm). The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

The coloured panels are using a staining process.

3- The 16mm diameter ropes are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

4- The fixings for the nets and chains are made from aluminium.

5- The net fittings are made of polyamide. The fittings are composed of two distinct parts for ease of maintenance of individual strands.

6- The climbing holds are made of polypropylene. They are non-toxic, inflammable and shock and UV resistant.

7- The ears are made from rubber, 14mm thick.

8- The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
