

# Climbing equipment

(technical specification)

J57011

1- **The 125mm diameter posts** are made of painted galvanised steel. The two-tone grey grained finish has a slightly undulating surface for increased scratch resistance. The caps are made of injection moulded polyamide.

2- **The 95 x 95mm posts** are made of painted galvanised steel, ensuring robustness and durability.

3- **The junction pieces** are made of painted galvanised steel.

4- **The caps** are made of rotary moulded polyethylene.

5- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

6- **The 16mm diameter ropes** are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

**7- The net fittings** are made of polyamide.  
The fittings are composed of two distinct parts for ease of maintenance of individual strands.

**8- The platform** is made from a 12.5mm thick textured and non-slip compact material (HPL).

**9- The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

**10-The sliding surface** is made of 2mm thick stainless steel, which is shaped, bent and rolled from one piece.  
The sides are made from a 13mm thick compact material (HPL).

**11-The climbing holds** are made of polyamide for its strength and rigidity.

**12-The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
