

Traditional equipment

(technical specification)

J4943

1- **The posts with average diameter 120 to 140mm** are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

2- **The panels and the shelf** are made from larch (plank sizes 140 x 27mm / 45 x 68mm). Larch is naturally resistant and long lasting.

3- **The roof** is made from larch logs (80 x 40 mm).

4- **The porthole** is made from lacquered Marine plywood. The colour is applied by electrostatic spraying of two-component polyurethane lacquer that is free of heavy metals, to ensure high levels of resistance to potentially aggressive chemicals such as anti-graffiti cleaning products.

5- **The abacus spheres** are made of polycarbonate sheets.

6- **The abacus pieces** are made from larch. The rail is made from 10mm diameter stainless steel.

7- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
