

1- The 95 x 95mm posts are made of painted galvanised steel, ensuring robustness and durability.

2- The caps are made of rotary moulded polyethylene.

**3-** The coloured panels are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

**4- The platforms** are made from a 12.5mm thick textured and non-slip compact material (HPL).

**5-** The tubes are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

6- Injection moulded polyamide fixings connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

Proludic

7- The 16mm diameter ropes are made of galvanised steel cable covered with polyester. The cables are linked together and held in place by injected polyamide spheres.

 8- The net fittings are made of polyamide. The fittings are composed of two distinct parts for ease of maintenance of individual strands.

**9-** The strap is made of 5 ropes linked together with aluminium pliers. Each rope, of 16mm diameter, is made up of galvanized steel cables covered in polypropylene.

**10-The sliding surfaces** are made of 2mm thick stainless steel, which is shaped, bent and rolled from one piece.

11-The climbing holds are made of polyamide for its strength and rigidity.

12-The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
