

ACTI'Fit (technical specification)

J37109

1- **The 102mm diameter posts** are made of painted galvanised steel. The two-tone grey grained finish has a slightly undulating surface for increased scratch resistance. The caps are made of injection moulded polyamide.

2- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

3- **The tubes used for the Parallel bars and Suspension bars** are made of electro-galvanized steel (diameter 34 mm) and stainless steel (diameter 40 mm), coated with epoxy paint. Electrogalvanization ensures corrosion resistance and provides a high quality finish. Stainless steel guarantees the longevity and robustness of the equipment over time. The epoxy paint ensures better grip.

4- **The fixing collars** are made of painted aluminium.

5- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

6- **The Balancing board** is fitted to a galvanized steel post, diameter 114 mm. A ball and socket joint ensures ease of movement.

7- The stainless steel rotation system is equipped with bearings.

8- The smartphone holder is made of polyamide for its strength and rigidity.

9- The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
