

ACTI'Fit

(technical specification)

J37112

1- **The 102mm diameter posts** are made of painted galvanised steel. The two-tone grey grained finish has a slightly undulating surface for increased scratch resistance.

2- **The caps** are made of painted aluminium (A) or rotary moulded polyethylene (B).

3- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

4- **The tubes used for the Parallel bars and Suspension bars** are made of electro-galvanized steel (diameter 34 mm) and stainless steel (diameter 40 mm), coated with epoxy paint. Electrogalvanization ensures corrosion resistance and provides a high quality finish. Stainless steel guarantees the longevity and robustness of the equipment over time. The epoxy paint ensures better grip.

5- **The fixing collars** are made of painted aluminium.

6- **Injection moulded polyamide fixings** connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

7- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

8- **The Central Column seating** is supported by a painted galvanized steel frame structure.

9- **The 70 x 70mm post** is made of painted galvanized steel, ensuring robustness and durability.

10-**The cap** is made of painted stainless steel.

11-**The polyurethane foam seats and backrests** ensure lasting comfort. Polyurethane foam is a resistant and shape memory material that helps to prevent overheating.

12-**The handles** are made of polyvinyl chloride.

13-**The steps** are made with a non-slip rubber overmould.

14-The hydraulic oil piston is made up of elements manufactured from chrome, aluminium and stainless steel. Users can adjust the resistance from just a few kilogrammes up to as much as 60kg on certain machines.

15-The Balancing board is fitted to a galvanized steel post, diameter 114 mm. A ball and socket joint ensures ease of movement.

16-The rings are made of 7mm diameter galvanised steel covered with rubber.

17-The smartphone holder is made of polyamide for its strength and rigidity.

18-The Coat Hook is made of polypropylene.

19-The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
